EXPERIENCE

Salesforce Developer(Internship)

Premium Learning Systems Private Limited

📅 12/2023 - Present 📍 Remote

- Designed data model and implemented complex Apex triggers, classes and batch process to automate business logic and data management
- Implemented Lightning Web Components to modernize user interfaces and improve user experience.
- Integrated Salesforce with third-party systems using REST APIs ensuring seamless data flow
- Assist in the development of custom reports and dashboards to provide actionable insights for business stakeholder.

Spatial Data Specialist

HERE Technologies

📅 2019 - 2022 📍 Mumbai

HERE is a PaaS for building, deploying and scaling location solutions. create custom maps, visualize location datasets.

- Active participation responsible achieving KPIs and constantly collaborate with stakeholders to improve the regions' freshness, rejections and metric.
- Was scrum master in team which helped to prioritize the task and clear the project backlog.
- Worked on high priority customer requirements and processing them within SLA.

PROJECTS

HOTEL RESERVATION MANAGEMENT APPLICATION

The hotel owner wants to build a hotel reservation management application in Salesforce

- This is a Hotel Reservation Management Application. Using this application the hotel management staff can create new room records in the hotel and customer records.
- The reservation objects keep the track of customer's all reservations in the hotel.
- It sends an Email when a new reservation is created and when that reservation is extended(which means record is updated)
- Chatter Post is done when new reservation is created which is only visible to the manager.
- Implemented Data model, Business Process Automation, Apex Triggers, Asynchronous Apex & LWC components

WEATHER FORECAST API PROJECT

This App with client-server API integration is a valuable tool.

- The Weather Forecast with Client Server API Integration is a user friendly weather application that provides real-time weather information based on the user's location or chosen city.
- This app with Client-Server API integration is a valuable tool, empowering users to stay informed about weather conditions, plan their activities, and make informed decisions based on current weather data.

SKILLS

Apex Programming Language

Lightning Web Components

Visualforce Pages and Components

Custom Metadata Type

Salesforce REST API HTML CSS

Approval Process Page Layout

Salesforce Object Query Language(SOQL)

Salesforce Object Search Language(SOSL)

Worked on Agile Methodologies(Scrum)

Experience as a Scrum Master

EDUCATION

📎 Bachelors of Engineering(E&Tc) Pune University

AISSM's IOIT,Pune
2014-2017

📎 HSC(Science)

Jai Hind Jr College, Pimpri
2012-2014

ACHIEVEMENTS

📎 Salesforce Trailhead Ranger

How did you acquire it? What did it result in?

PROJECTS

WELLNESS CALCULATOR

This project helps individuals assess their weight status and make informed decisions about their health.

- A wellness Calculator project a software application that calculates a person's BMI based on their weight and height. The project involves creating an interface where users can input their weight and height, and the application calculates and displays their BMI value.
- this project was built using Lightning Web Runtime (LWR) and lightning experience. There is no data table in this project.
- All the logic was built using JavaScript and HTML in this project

SMART ALARM CLOCK

This application allows users to set an alarm , trigger the alarm to ring with a ringtone and animation , and stop the alarm.

- The ringtone and animation logic can be customized based on your specific requirements and the capabilities of the chosen libraries or technologies.
- Implemented layout designing . Used SLDS library and Dynamic styling using getter.
- Also created reusable component and implemented alarm functionality in JavaScript.
- We built this project using LWR, add animation to shake the image.
